

# **Title of the report**

*Name of the authors and eventually coauthors*  
M2TSI, 2016-2017

**Report format : 15-20 pages including figures**

**Article format : less than 10 pages including figures.**

## **Abstract (10 lines maximum)**

### **I-Introduction**

1-Context of the study (with references)

2-Aim of the study

(What do you want to show+satellite data + method used)

3-Description of sections, what are you going to present.

### **II-Description of the satellite instrument (use subsections if several instruments)**

(platform, instrument, resolution, satellite launch date, aim of the satellite, etc..)

### **III-Description of the observations (use subsections is several different datasets)**

(Number of images, resolution of images, period, domain, etc.)

### **IV-Detailed description of the method (use subsections if several different methods)**

(Why do you use this method, filter, any method used, etc.)

### **V-Discussion**

Description of the results and explanations of main results using different figures

All figures should have a number and a detailed legend.

### **VI-Conclusions**

What was your story

What is your story finally

findings

eventually further work

### **VII-References**

All references including web sites should be here with alphabetical order

### **VIII-Annex**

Any other information, you could send in a separate package the software and data if necessary
